To minimize iatrogenic trauma to the urinary bladder and adjacent structures and contamination of the urine sample with blood, routine cystocentesis should not be performed unless a sufficient amount of urine is in the lumen to permit localization and immobilization of the bladder by abdominal palpation.

Cystocentesis: Lessons from 30 Years of Clinical Experience

Youâ€™re probably wondering what my 30th lesson is, right? Well, since I always try to be the dumbest person in the room, Iâ€™ve learned to ask the right questions. The right questions ignite innovation, solve problems, create marriages and powerful partnerships, and help us live a better life.
